## **CHAPTER 47   MASTER NUMBERS NOS 11 ....22... 33...**

The science of Numbers is one of the most fascinating science which has special aspects has to do with the Master numbers. There are three Master numbers—they are 11, 22 and 33. Some experts and even some Numerology books also consider 44, 55, and 66 forth as to be the fourth Master numbers. A while back I flipped through Numerology for Dummies in a local book store. Various books claim that any double-digit number consisting of two identical digits is a Master number. See if the Master numbers are heavy in your own Numerology with a personalized Numerology Personality Profile. The fact that the numbers 11, 22, and 33 are double-digit numbers consisting of identical single digits are not the reason they are considered Master numbers. The 11 is a Master number because the 11 contains the digit 1 twice, the 22 is a Master number because it consists of the number 2 twice and 33 is made up of the number 3 twice making that also a Master number. It is the repetition of the numbers 1, 2, and 3 specifically that makes the 11, 22 and 33 Master numbers. The 44, 55, 66 and so forth have what could be called a "focused and charged energy" compared to, for example, the numbers 45, 56, 67, but they are NOT Master numbers. There are 3 double-digit numbers that, while they are rooted in the single-digit numbers, require special emphasis and attention. These are 11, 22 and 33. They are called Master numbers because they possess more potential than other numbers. They are highly charged, difficult to handle and require time, maturity and great effort to integrate into one's personality.

### **Master number 11**

The 11 is the most intuitive of all numbers. It represents illumination, a channel to the subconscious, insight without rational thought, and sensitivity, nervous energy, shyness and impracticality. The 11 is a dreamer. It has all the aspects of the 2, enhanced and charged with charisma, leadership and inspiration. It is a number with inborn duality, which creates dynamism and inner conflict with its mere presence. It's a number that, when not focused on some goal beyond itself, can be turned inward to create fears and phobias. The 11 walks the edge between greatness and self-destruction. Its potential for growth, stability and personal power lies in its acceptance of intuitive understanding, and of spiritual truths. For the 11,

such peace is not found so much in logic, but in faith. It is the psychic's number.

### Master number 22

The 22 is the most powerful of all numbers. It is often called "the Master Builder." The 22 can turn the most ambitious of dreams into reality. It is potentially the most successful of all numbers. It has many of the inspirational insights of the 11, combined with the practicality and methodical nature of the 4. It is unlimited, yet disciplined. It sees the archetype, and brings it down to earth in some material form. It has big ideas, great plans, idealism, leadership and enormous self-confidence. If not practical, 22s can waste their potential. Like the 11, the 22 can easily shrink from its own ambition, causing difficult interior pressures. Both the 11 and the 22 experience the pressure-cooker effect very strongly, particularly at an early age. It must work toward the realization of goals that are larger than personal ambition. The 22 serves the world in a practical way.

### Master number 33

The 33 is the most influential of all numbers. It is "the Master Teacher." The 33 combines the 11 and the 22 and brings their potential to another level. When expressed to the fullest, the 33 lacks all personal ambition, and instead focuses its considerable abilities toward the spiritual uplifting of mankind. What makes the 33 especially impressive is the high level of sincere devotion. This is shown in its determination to seek understanding and wisdom before preaching to others. The 33 in full force is extremely rare. The number 33 only matters when found among the core numbers of a person's Numerology chart: the Life Path number, Heart's Desire, Expression, Personality, Together, the three Master numbers represent a triangle of enlightenment:

The number 11 represents the vision.

The number 22 combines vision with action

The number 33 offers guidance to the world

The sun and the moon are the only two planets having 'double numbers'. The sun and Uranus are interrelated and so is the moon and Neptune. There is a strong attraction between numbers 1-4 and 2-7 and these four numbers are

compatible with each other, especially if born in Cancer (21 June to 20 July) and Leo (21 July to 20 August). Numbers 7 and 4 were allotted to the moon and the sun until Neptune and Uranus were discovered. Presently, number 4 is the number of planet Uranus or Rahu (north node of the moon) that is given the rulership of Aquarius and number 7 is given to Neptune or Ketu (south node of the moon) which rules Cancer.

In its positive aspect. The twelve signs of the Zodiac are further divided into categories: Cardinal, Fixed and Mutable. Every third sign starting from Aries is Cardinal, every third sign from Taurus is fixed and every third sign from Gemini is Mutable. Cardinal signs are movable signs, which means that they are easy to get on with, as they are accommodating. Fixed signs are immovable, which makes them stubborn and uncompromising and unbending. Mutable Signs are flexible, which means they are ever ready to change, compromise and adjust.

CARDINAL: Aries. Cancer. Libra. Capricorn.

FIXED: Taurus. Leo. Scorpio. Aquarius.

MUTABLE: Gemini. Virgo. Sagittarius. Pisces.

Every alternate sign starting from Aries is Male (Positive) or Female (Negative)

MALE: Aries Gemini Leo Libra Sagittarius Aquarius

FEMALE: Taurus Cancer Virgo Scorpio Capricorn Pisces.

The signs are either Fruitful, Barren or Duel:

BARREN: Aries Cancer Libra Capricorn

FRUITFUL: Taurus Leo Scorpio Aquarius

DUEL: Gemini Virgo Sagittarius Pisces.

Owing to the passing of the sun from one zodiac sign to the other, seven days are given at the beginning and seven days after the end, which is the period, called 'The Cusp'. During this period of the month, its qualities and vibrations are not as strong as strong as the rest of the month. The CUSP PERIOD takes on to some extent, the qualities of the passing sign with those of the one coming into force.

Planets have a POSITIVE or NEGATIVE aspect in accordance with the period of the Zodiac they rule.
